L. EMPLOYEE BENEFITS

Defined contribution plans

Contribution to provident fund and employee state insurance scheme by the entities in the Group are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees.

Defined benefit plans

For defined benefit plan in the form of gratuity the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuation being carried out at each balance sheet date. Actuarial gains and losses are recognised in the Restated Consolidated Summary Statement of Profit and Loss in the period in which they occur. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested. The retirement benefit obligation recognised in the Consolidated Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to the present value of available refunds and reductions in future contributions to the scheme.

Short-term employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the period when the employees render the service. These benefits include compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related service.

The cost of short-term compensated absences is accounted as under :

(a) in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and

(b) in case of non-accumulating compensated absences, when the absences occur.

M. RECOURSE OBLIGATIONS UNDER ASSIGNMENT TRANSACTIONS

The holding company used to assign loans under assignment transactions under "at premium structure" upto F.Y. 2011-12. Such loans were derecognised and gains/losses were recorded on assignment of loan contracts. The recourse obligations with respect to these loans assigned were provided in books as per past track record of delinquency/servicing of the loans of the holding company.

N. BORROWING COSTS

Borrowing Costs include interest and amortisation of other ancillary costs incurred in connection with borrowings. The Costs incurred in connection with borrowing of funds to the extent not directly related to acquisition of a qualifying asset are charged to the Restated Consolidated Summary Statement of Profit and Loss over the tenure of the loan.

O. EARNINGS PER SHARE

Basic earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares, if determinable. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted for share splits / reverse share splits and bonus shares, as appropriate.

P. TAXES ON INCOME

Current tax is determined on the basis of taxable income computed for each of the entities in the Group in accordance with the applicable tax rates and provisions of the Income Tax Act, 1961.

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets are recognised for timing differences of items other than unabsorbed depreciation and carry forward losses only to the extent that reasonable certainty exists that sufficient future taxable income will be available against which these can be realised. However, if there are unabsorbed depreciation and carry forward of losses and items relating to capital losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that there will be sufficient future taxable income available to realise the assets. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the entity has a legally enforceable right for such set off. Deferred tax assets are reviewed at each balance sheet date for their realisability.

Current and deferred tax relating to items directly recognised in reserves are recognised in reserves and not in the Restated Consolidated Summary Statement of Profit and Loss.

ANNEXURE 5 : SUMMARY OF CONSOLIDATED SIGNIFICANT ACCOUNTING POLICIES

Q. CASH AND CASH EQUIVALENTS (FOR PURPOSES OF CASH FLOW STATEMENT)

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

R. CASH FLOW STATEMENT

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Group are segregated based on the available information.

S. LEASES

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor are recognised as operating leases. Lease rentals under operating leases are recognised in the Restated Consolidated Summary Statement of Profit and Loss on a straight-line basis over the lease term.

T. PROVISIONS AND CONTINGENCIES

A provision is recognised when the Group has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are not discounted to their present value and are determined based on the best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the Notes. Contingent assets are not recognised in the financial statements.

- Compulsorily Convertible Cumulative Preference Shares**
The Company had entered into Share Subscription and Shareholders Agreement ("the Agreement") with Nederlandse Financierings-Maatschappij Voor Ontwikkelingslanden N. V. (FMO) ("the Investor") pursuant to which, the investor had subscribed to and had been allotted 43,471,090 Cumulative Compulsorily Convertible Preference Shares (CCCPS) of the face value of Rs. 10 each at par.
The CCCPS carried a right to be paid a fixed cumulative preferential dividend at the rate of 7% per annum free of income tax till the Financial Year ending on March 31, 2014. After this date, under the circumstances specified in the Agreement, the rate of dividend was to be increased as provided for in the Agreement. In the event of the Company not having sufficient profits to distribute dividends to all the preference shareholders in full, the dividend was to be distributed to FMO after ICICI Venture and in priority over all other preference shareholders.
The holder of the preference share capital had, in respect of such capital, a right to vote only on resolutions placed before the company which directly affect the rights attached to his preference shares.
As per the Agreement as amended by the First Amendment dated October 19, 2011 to the Agreement, the CCCPS were compulsorily convertible into equity shares at any time within 20 years from date of allotment at a conversion price to be determined based on the time of conversion and IRR to be provided to the Investor on its investment as per the terms of the Agreement.
As per the Agreement, FMOs Shares were to become immediately due upon liquidation, dissolution, winding up or insolvency of the Company and the ranking of settlement of such payables was to be in line with prevailing Indian legislation at such time, provided, however that as between FMO and other preference shareholders, ICICI Venture would rank in priority over FMO which in turn would rank in priority over all other preference shareholders.

The shares were redeemable in one instalment on June 15, 2012 at face value plus a redemption premium which was to be calculated based on the IRR as per the terms of the agreement (including its amendment thereof). As per the terms of the agreement (including amendment thereof), upon occurrence or non-occurrence of certain events, the investor had a right to convert, at its option, the CRPS into fully paid-up equity shares of the Company at a rate to be determined based on fair value of the equity shares to be calculated in the manner as stated in the agreement.

The Holding Company had determined to charge the premium on redemption of the aforesaid CRPS, against the securities premium account arising from the issue of securities that it proposed to make, as per the provisions of Section 78(2)(d) of the erstwhile Companies Act, 1956. Under the circumstances, during the F.Y. 2011-12, due to the variables indeterminate at that point of time, the proportionate redemption premium for that year amounting to Rs. 146.26 million (cumulatively Rs. 203.09 million upto March 31, 2012) had not been provided for in the Statement of Profit and Loss for that year.

During F.Y. 2012-13, the Holding Company has redeemed the aforesaid CRPS of nominal value of Rs. 400 million at a premium of Rs. 221.32 million. The CRPS have been redeemed out of proceeds of a fresh issue of 499.80 million Compulsorily Convertible Debentures (CCDs) aggregating to Rs. 649.74 million (including premium of Rs. 149.94 million) made by the Holding Company during the that year. The redemption premium on CRPS of Rs. 221.32 million (Rs. 120.15 million from Security Premium and Rs. 101.17 million from Surplus in Statement of Profit and Loss) has been provided in the Financial Statements for the F.Y. 2012-13.

Based on a legal opinion taken by the Holding Company, the CCDs have been considered to be in the nature of "Equity" and in view thereof, no amount has been transferred to "Capital Redemption Reserve Account" as the fresh issue of CCDs has been considered as "fresh issue of shares" as envisaged under the provisions of section 80 of the erstwhile Companies Act, 1956.
